District and Map Index

Nepal Index

Scale: 1:45,000

0 1 2 4 6 8 Kilometers

Land use zoning map based on the orthorectified satellite image produced through the fusion of World View 2 in MS and Panchromatic 25 meter spatial resolution acquired on 2020 and some data were obtained from Google Earth Pro and SAS PLANET very high Resolution Google earth images. Basically the zoning was based on land use map and report from National Land Use Project subjective analysis of present land use. Forest land use was also considered while deriving the boundary of land zoning. Extensive field study, Public Auditing, was carried prior to delineating to have better understanding of the social setting of the study area.
